TO HER NAME

Remarkable Performances of Defender in the Second Trial.

BETTER THAN VIGILANT

Light Weather Seems to Suit
Her Very Well.

Everything Done to Vigilant That Was Possible to Put Her in Condition, and Yet the New Boat Upon Which Our Hopes Are Centered, Clearly Walks Away From the Successful Opponent of Dunraven's Yacht Two Years Ago.

NEW YORK, July 22.—The second trial that Defender had in New York water against the Vigilant today furnished more evidence that the new boat is better than the old one in light weather. They sailed over the triangular course outside of Sandy Hook, and were tested in pretty nearly every kind of sailing. They started out before the wind, but before they had gotten half way on the journey of the first leg of ten miles, they were sailed with the wind over the quarter; before they got to the end of the first leg the

They were even more closely hauled; on the second leg they were reaching free and attacking, and on the final angle they were able to head to the home mark with a fairly well-filled sheet.

Leaves No Doubt.

The result left no doubt as to the respective qualities of the boats in the kind of weather that prevailed, but the weather was of the lightest character.

At no time did the breeze blow harder than twelve knots an hour, and it fell a time to four. On the run before the wind at the start, the Vigilant not only held her own for a period, but at the end of four miles was well ahead of her defender. This run was made with spinnaker set and drawing, under which conditions it is almost universally conceded the Vigilant is the fastest boat in the world.

world. She showed those same qualities here as well as on the other side of the Atlantic. When it came to the point where the wind was a little less, the men in the wind schnappers had to be hauled in and booms hauled on board. Defenders instantly shot ahead. She kept ahead and was never afterwards overhauled during the race. The wind, however, might have been on certain little portions of the course where the wind dropped to almost nothing. In these places it seems as though the *Vulcan* picked up, but the gain was inconsiderable.

It was the Vigilant that showed up with new sails this morning, but it turned out she only had time to make one run before the wind died and she was used on Saturday. One improvement there certainly was in her hull. The outside of the hull was covered with barnacles and grass. The board had not been touched for polishing. The inside of the hull was polished at the Eric basin for the cleaning of her hull, because there was no room to lower the hull in the water. The improvement when the diver had finished, was no small one. It, together with the change in the sails, made the boat look much improved. There, without doubt, than she did on Saturday. Yet the only time she gained on the Vigilant was on the 10th, when the old champion centerboard hauled up, and it was of no use whatever.

Performance Remarkable.

The Defender appeared in just about the same old shape as she was in the first race. Trifling improvements had been made in her block work and a small outboard motor had been added.

If there was any improvement in form it was in the Vigilant and that makes the Defender's performance all the more directly after the start, the racers found themselves running dead before the Defender. The Defender was in the boom at the first sign of a dead stern wind and it was not a minute later that the Defender was in the lead. She sailed with mishap at the start, a small sloop getting in her way. She was on the edge of the boom and the Defender still on the port. Defender came around

Just before the line was reached, but refused to give way to the other boat. Defender's starboard tack, had the right of way. It looked as though there would be a collision, but the two boats were able to pass each other. Defender's starboard tack was on the right, and went about on the port tack, passing in under Defender's lee quarter until she was clear.

Vigilant Protests.

Vigilant at once raised a flag of protest, but the space of time of it at the time by the committee. The yachts went over the line with jib topsails flying and continued up to the time that the committee had signalled the spinners were hauled in Defender began to go ahead.

But the space of a mile from the time the spinners were hauled down, Defender was a good sixteenth of a mile ahead. Rounding the first mark, despite the protest, Defender was a good sixteenth of a mile further distance to go, she perceptibly gained on Vigilant, making a very pretty race. After the second mark, Defender went away on the starboard tack with

cells quite full, in true racing style. She was very quick coming up into the wind, and when the breeze was backed, she held her head up and went very quickly through the water, close hauled, and when the breeze backed again, that had died down to about six miles an hour. Vigilant did not go so close to the buoy as the other boats, but as fast, jib topsails were run up at the beginning of the second leg, and as the wind freshened a little bit, the center sails were run up. At 2:29, Defender found she could not weather the second mark, so she went about to the right, and as there was a bit of breeze aft, she showed how she could spin around from one tack to the other.

At 2:30, Defender tacked to port, Vigilant still holding on. At 2:45, Vigilant went around to port, showing herself to be from the inside of the line tacking. The Defender came along in line style and passed the last buoy at 2:50:15. The Defender did not get inside the buoy until 2:57:25. They came home without a tack, a point or point and a half from the line. The Defender was a few minutes only gained that, and the finish took place among the great blowing of whistles and the firing of cannon and the waving of herms from the boats. A collection of steam yachts and excursion boats that were gathered about the line. The Defender, 4:19:59; Vigilant, 4:28:47. Thus the Defender wins by 9 minutes, 11 seconds.

NOT MUCH IN IT.

So Says Consul Wilder, of Hawaii,
Referring to a Recent Rumor.

SAN FRANCISCO, July 22.—Consul Wilder of Hawaii says he does not

CASE OF GREEK MEETING GREEK.

That is the Opinion of the Associated Press Representative.

CHICAGO, July 22.—"Back dates" were thrown to the dogs today in the

ere thrown to the dogs today in the debate between Horr and Harvey. It was more than ever a case of Greek met Greek, and as the interested tug

If war heightened it was at once seen that the days of Pericles as well as 1902, 1873 and other years, no matter how historic or important were all

Talks of the Ratio.

Horr opened with a written argument touching the impossibility of maintaining a fixed ratio between gold and silver. As a result of experience,

said, all civilized nations discarded silver as a standard money. It was useless to exploit the lone tables of statistics to show whether a double standard could be maintained. The world had pronounced against silver. Harvey said he had been called on

letters and telegrams to give statements by Blaine, Ingalls and others concerning the demonization act. He said words at his disposal in debate would not admit of it. Taking up Morr's eulogy of Senator Morrill, delivered Saturday, he charged that Morrill acted in saving no silver dollar

had been coined for forty years prior to 1873. Harvey read from the report of the director of the mint, showing that silver dollars to a greater or less amount had been coined nearly every year. The fact was that Morrill was a bank stockholder, with a bank stockholder's prejudices. He called on Hor-

Horr Explains.
Horr said that Morrill had not meant to say that not a dollar had been mined, but none to speak of had been. At most, it could be said Morrill had made a mistake. Harvey in his book had made a bad mistake in stating the

amount of silver coined during the life of the government. Mr. Horr declared the insinuation that because Judge Horrill was an owner of bank stock, he was not believed, to be too contemptible for consideration.

Mr. Harvey said that in raising the mint of coinage of silver prior to 1873

wanted to establish a fact in history which had been obscured by false statements that such coinage had not taken place. He wanted to make this answer in the presence of the gold men. Proceeding, Mr. Harvey said he did not mean to reflect on any man's integrity because he was a bank robber. He merely wanted to show

Scientific Bimetallism.

When the parity between the gold and silver should require, the option be left to the individual, and the government to pay in the cheaper metal. It is held that under these conditions silver would not depreciate because there would be an unlimited demand at a ratio fixed by law, and no man could sell his bullion below the value

which he could have it coined. Mr. Harvey submitted a table to show that from 1887 to 1873 the commercial ratio had remained remarkably close to the legal ratio, notwithstanding the demonetization of it by England and another of the great nations of the old world.

Mr. Herr said this matter of raising little or nothing to do with the question. The fact was that all the civilized nations of the world refused to recognize silver except at its bullion value. For us to attempt free coinage alone was not the matter.

A. Dodger.

Mr. Hoar then took the proposition Mr. Harvey's book that making the dollar one-half the present value would double the value of everything in the United States except debts. Mr. Hoar pronounced this absurd, saying we might as well say that if we cut our bread sticks in two it would double

He said Mr. Harvey seemed to be tucked on "sweet '15 to 1." In his book he proposed to keep metal value at parity by reducing the amount of gold in the gold dollar. Carried to legitimate results, the ratio would come 16 to 15 or 32 to 1.

Mr. Harvey proceeded to argue that gold and silver were the measure of values until 1873. Referring to the titling of the yardstick in two Mr. Harvey said that the gold men had tumbled the yard stick in 1873. He asked whether if half the gold were destroyed, the value of the gold dollar

Shook His Locks.
Mr. Horr shook his head. Mr. Har-
vey said he would illustrate it in an-
other way which the farmers would
understand. If half the wheat crop
the United States were destroyed
would not the price of wheat on the

the board of trade be doubted?
demonetizing silver in 1873, the gold
the yardstick had been doubled.
The friends of silver were merely ask-
ing for the restoration of the measure
readmitting silver to coinage.

Mr. Horr, in reply to the charge that
the demonetization of silver cut the

the products in two, said that if they were true, prices would have at once dropped 50 per cent. The fact is that they did not. If the destruction of half the wheat crop would raise prices four fold the demonization of silver did not destroy it. Returning to the attack, Mr. Horr said that Mr. Harvey did not care for

What he wanted was a cheap dollar and the cheapening of the elements of labor. That was the
